

D_s correction

Fit $D_s \rightarrow \phi(\mu\mu)\pi$ in data.

A RooPlot of "mass"

• mean = $1970.33 \pm 0.92 \text{ MeV}$

Fit $D_s \rightarrow \phi(\mu\mu)\pi$ in MC.

A RooPlot of "mass"

• mean = $1969.06 \pm 0.60 \text{ MeV}$

D_S correction

- $mean_{\tau \rightarrow 3\mu} = \frac{1970.33}{1969.06} \times 1777.73 = 1778.88 \text{ MeV}$

Fit $\tau \rightarrow \mu\mu\mu$ in MC.

A RooPlot of "mass"

- $mean = 1777.73 \pm 0.35 \text{ MeV}$
